As a Frontend Developer, I build high-performance, SEO-oriented, and responsive web applications and websites using modern web technologies, including Next.js, Vue.js, React.js, and Angular.js. I have experience creating interactive user interfaces (UI) with HTML, CSS, JavaScript, and TypeScript, coding based on UI/UX designs, and ensuring cross-browser compatibility.

On the backend side, I have experience with PHP and the Laravel framework, developing server-side functionality, integrating APIs, and working with databases. I focus on performance optimization, improving code quality, and writing unit and integration tests. My goal is to deliver optimized, fast, and reliable web solutions for clients and end-users.

I hold both a Bachelor's and a Master's degree from Azerbaijan State Oil and Industry University and have completed my military service.

Skills

Frontend: HTML5, CSS3, SCSS, JavaScript (ES6+), TypeScript, React.js, Next.js (SSR/SSG/ISR), Angular.js, Vue.js, Redux, React Router, Formik, Yup, Axios, i18n, Hooks, Styled Components, Bootstrap, Tailwind CSS

Backend: PHP, Laravel, REST API, MySQL
